

Challenges from a Registrar Perspective

from Peter Larsen (Larsen Data) and Tobias Sattler (united-domains)

1.) OT&E

- Getting 2 Accounts
- Getting Documentation
- Getting Test Domains
- Being in sync with Production
- Keeping them

2.) EPP

- Less Extensions
- Be automated
- Be standard
- Enough Notice Period for Changes
- Up-to-date documentation

3.) Legacy Policies and Systems

- SOAP / Email / paper forms announcing
- Never updated, impossible to implement
- Policy Making and interpretation of European Law

4.) What happens if ..

- Drop of Names?
- Security?
- etc.
